Education

The University of Mindanao

2nd year Bachelor of Science in Computer Science

Matina Crossing, Davao City, Davao del Sur

August. 2022 – Present

Volunteer Work

Chief Technology Officer

2024 - 2025

UMSDC - University of Mindanao Student Developer Community

- Organized and led tech workshops to keep members informed about the latest industry trends and tools.
- Developed and maintained the organization's website and digital resources.
- Managed tech initiatives, such as event management systems and member databases.
- Ensured members had access to up-to-date technology solutions to enhance productivity and collaboration.

Lead Mentor

2024 - 2025

University of Mindanao College of Computing Education Skill Clinic

- Guided and supported students in developing computing skills and problem-solving techniques.
- Organized and led skill-building workshops and coding clinics for students.
- Provided one-on-one mentorship, helping students improve their technical abilities.

Projects

VIDMAC DTR and Payroll Management System | Tech Stack: Java, Swing, MySQL

- Created a DTR and Payroll Management System as part of academic requirements, employing Java Swing and MySQL.
- Streamlined navigation and user-friendly features ensure a seamless and intuitive experience.
- Emphasized user-centric design, anticipating needs for a satisfying interaction in the management of attendance and payroll.
- Demonstrated commitment to continuous improvement by iteratively refining the project based on feedback from classmates and instructors within the academic setting.

Apartment Management System | Tech Stack: Java, Swing, MySQL

- Developed an Apartment Management System using Java Swing and MySQL for Academic Requirements.
- Ensure effortless navigation and user-friendly features for a smooth and intuitive experience.
- Prioritize user needs, anticipating expectations for a seamless and satisfying interaction.
- Iteratively improved the project based on feedback from classmates and instructors, showcasing a commitment to continuous learning and refinement within the academic environment.

UMSDC Management System | Tech Stack: Express.js, React, Prisma, Cloudinary, JWT, MySQL, Git (Azure VM)

- Developed UMSDC Landing Page, Admin Page and RESTful API using React and Express with Prisma for efficient backend operations.
- Integrated Cloudinary for handling image uploads, including membership submissions and e-signatures.
- Implemented JWT-based authentication and Cloudinary for managing membership submissions and e-signatures.
- Deployed on Azure VM for scalability and reliability.
- Styled with Tailwind CSS and ShadCN for a modern, responsive design.
- Used Git for version control and collaborated on continuous feature improvements.

UM Enigma Management System | Tech Stack: Express.js, React, Prisma, Cloudinary, JWT, MySQL, Git (Azure VM)

- Designed and implemented the UM Enigma Landing Page, Admin Dashboard, and RESTful API using React and Express, leveraging Prisma for streamlined database interactions.
- Integrated Cloudinary to manage image uploads for membership applications and digital signatures, ensuring efficient storage and retrieval.
- Established secure user authentication and authorization using JWT, safeguarding user data and enhancing overall system security.
- Deployed the application on Azure VM, optimizing for scalability and reliability in production environments.
- Crafted a modern, responsive user interface using Tailwind CSS and ShadCN, ensuring an intuitive user experience across devices.
- Employed Git for version control, promoting collaborative development and enabling continuous integration and feature enhancement.

Technical Skills

Programming Languages: Java, SQL, NoSQL, JavaScript, TypeScript, PHP, Python, Ruby, Shell Script, HTML/CSS

Frameworks: React, Tailwind CSS, Bootstrap, Material UI, ShadCN, Laravel, Express.js, Java Spring, Redux

Developer Tools: Git, VS Code, Visual Studio, WebStorm, Eclipse, NetBeans, Postman, Nginx

Certifications & Training: ITS Java Specialist Certified, TryHackMe Jr. Pentester, TryHackMe SoC Level 1
